OTOMETRICS AND UNIVERSITY CLINIC OF NAVARRA HOST 2-DAY COURSE IN VESTIBULAR ASSESSMENT

Unique opportunity to learn more about vHIT, VEMP and ICS Impulse from leading experts, November 13-14, 2015 in Madrid, Spain

Taastrup, Denmark | June, 2015 – GN Otometrics, the leading global manufacturer of hearing and balance instrumentation and University Clinic of Navarra, Department of Otorhinolaryngology will host a two-day course, *Vestibular Testing: Today's Advances*, November 13-14, 2015 at the HOTEL NH Eurobuilding in Madrid Spain.

This course presents an interactive review of the methodology of vestibular testing using video Head Impulse Test (vHIT) and Vestibular Evoked Myogenic Potential (VEMP) techniques. Participants will be able to see and take part in practical demonstrations using the ICS® Impulse with the leading experts in their field, Dr. Professor Ian S. Curthoys and Professor Dr. Michael Halmagyi and others.

“New vestibular testing techniques can help improve objectivity and treatment options for patients with given symptoms,” says Nicolás Pérez, Professor and Chairman Dept. of Otorhinolaryngology University Clinic of Navarra, Pamplona, Spain. “We are proud to host this educational event and welcome Drs. Curthoys and Halmagyi and who, with other leading international and Spanish guest speakers, will give participants detailed, practical information on using vHIT, VEMP testing techniques with the ICS Impulse.”

The two-day course will include several hours of supervised practical application of bedside and emergency room vestibular testing and afternoon workshops on vHIT and VEMP. Morning sessions will be available with simultaneous English-Spanish translation.

“Enabling vestibular assessment education and training events like this one is a cornerstone of our strategy with ICS Impulse,” says Anders Lund, Project Manager at Otometrics. “Knowledge of new technologies and techniques such as ICS Impulse and vHIT and VEMP gives balance care professionals more options to help their patients receive faster and more precise diagnoses.”
